

Mobile Air Conditioner Systems

Our high performance portable air conditioner features heat pump technology, enabling this unit to both heat and cool at the push of a button. Fitted with easy-roll castors it can be conveniently moved from room to room as required. A ducted exhaust hose is included with the system to vent the hot air to the outside of the building.

An adjustable window mounting panel is also supplied to attach the exhaust hose for ease of use.

This unit benefits from an automatic inbuilt condensate pump, which pumps the water out with the exhaust air, so there is no water tank to empty.
