

Swimming Pool Heater

DIY Heat Pump Systems to heat your Pool ALL YEAR ROUND

In the UK all swimming pools need to be heated in some way to get the maximum usage from them each year.

Until recently the options for heating a pool have been Gas, Electric or Oil, all of which are either costly to run or difficult and expensive to install, or both. Our Heat Pump Pool Heaters are both easy to install and inexpensive to run.

They also feature Titanium Heat Exchangers for longer life expectancy.

Features

- ▶ Digital LED Controller
- ▶ Titanium Heat Exchange
- ▶ Auto Restart after power cut
- ▶ Intelligent Defrost
- ▶ Quiet Running and Low Running Cost
- ▶ 80% More Efficient than Conventional Electric

Specifications

Power Rating	220-240V / 50Hz
Heating Capacity BTU/h	71652 (21kW)
C.O.P @ 25 degrees C Ambient (w/w)	5.8
Advised Pool Volume m ³ (with insulated pool cover)	80-100
Advised Water Flow m ³ /h	6-12
Rated Power (Kw) / Max (A)	5.05 / 32.1
Running Current / Max (Amps)	18.6
Noise dB (@ 1M)	54
Net Dimensions (mm) LxDxH	1115x420x1245
Net weight / Gross weight (Kg)	113
Water Inlet & Outlet Size	1.5"

All ACC product's are guaranteed for 12 months (unless otherwise stated) from the date of original purchase.
