

White Gloss WiFi Enabled Inverter Wall-Split

Our EASYfit split airconditioners comprises of two elements - an internal and external unit. The internal unit is fitted to a metal bracket on the wall in the room to be cooled/ heated, whilst the external unit is situated outside the building. The two are connected using copper pipe work (2 pipes). The external unit, or condenser, removes the heat/cold from the room and dissipates it outside, along with any condensation that has built-up in the system, whilst the internal unit provides cooling. All of our high wall-split range now come with Alexa and Google Home compatibility, making hand controllers a thing of the past! Just simply use the mobile application to bind the system to your WiFi, you can then connect your Alexa/ Google Home to this application to voice control this model.
